

College and Career Readiness Indicator

Alan Burrow
Executive Director
Office of District and School Performance

What is the College and Career Readiness Indicator?

- The ACT is used to measure the College & Career Readiness (CCR) component.
- The highest sub-scores for each student as of May of 2019, will be used in the CCR indicator.
- Students must meet or exceed the benchmark established by ACT in English or Reading and Math.

Who is included?

- The ACT scores of all students identified in the Senior Snapshot will be included in the calculation.
- A student's score will be applied to the school in which the student is enrolled in MSIS at the time of the Senior Snapshot.
- Due to requirements under ESSA, there is no longer an exclusion for SCD students.

What do districts need to do?

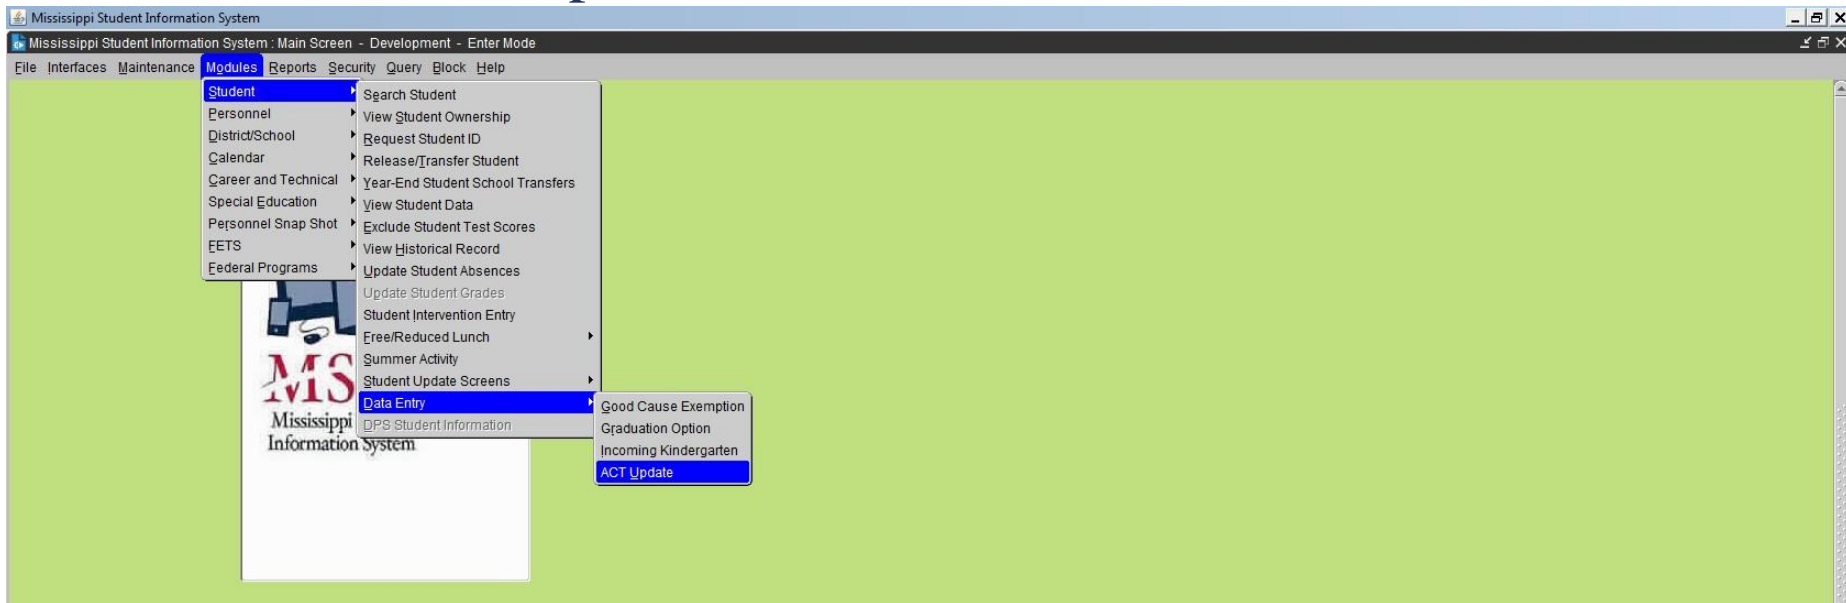

- The MDE has populated the scores from the 2017-2018 state, junior administration of the ACT in MSIS.
- Districts will be responsible for recording any sub score that is higher than the scores earned during the 2017-2018 statewide ACT administration.
- Only scores earned through May 2019 should be entered.
- Any changes to the highest sub score must be entered in MSIS by 5 p.m., July 26, 2019.

What do districts need to do?

- There is no need to enter an updated score if the student has met the ACT College Readiness Benchmarks for English or Reading and Math.
- Students with no score from the state administration may have scores entered from a different administration to get participation credit.
- The ACT College Readiness Benchmarks are as follows:
English – 18, Reading – 18, Math – 22

Where are ACT scores located in MSIS?

- Modules
 - Student
 - Data Entry
 - Act Update
