

LOCKER **PRO**

LOCKER & STORAGE SYSTEM SPECIALISTS

In today's troubled times with the Coronavirus threat hanging over virtually all establishments where people are involved, Locker Pro wants to do what we can to normalize everyday life. Through our partners at **Troax**, we are offering an inexpensive, convenient and mobile solution.

PC PANEL FOR MANY APPLICATIONS

With the **Troax** Polycarbonate Panel, you get a perfect Social Distancing Guarding. The PC panel is available in many sizes and can be mounted in various ways depending on what type of application is requested.

- Offices, Gyms
- Factories, Warehouses
- Restaurants, Grocery Stores
- Schools, Classrooms, Hallways
- Reception Desks, etc.

DO YOU NEED IT FIXED OR MOBILE?

You can, for example, place it both on and between tables, or you can have it free-standing, fixed or mobile. Combine multiple panels to form 90-degree angles.

With the new Mobile kit together with the PC panel, Troax has created a very flexible Social Distancing Guarding. One side is equipped with a stationary foot and the other with wheels, allowing easy and convenient mobility.
