

The Mississippi Department of Education is excited to announce an opportunity for **district administrators, principals, lead teachers, and instructional coaches** (K-8 and Algebra I) to attend an in-person professional development training titled *Moving Math in Mississippi: Phase I* focusing on the Core Actions of Math, HQIM implementation, manipulatives and student engagement.

HQIM and the Core Actions of Math

These sessions will explore the relationship between High-Quality Instructional Materials (HQIM) and the Core Actions of Math outlined in MIOP. The goal of the sessions is to support implementation and instructional delivery rooted in best practices such as the Mathematical Practices and Effective Mathematics Teaching Practices.

Manipulatives in the Classroom

These sessions will explore the relationship between High-Quality Instructional Materials (HQIM) and hands-on learning opportunities that will create a real-world connection for all students. The goal of the sessions is to provide educators with practical ways to implement manipulatives into their daily lessons to enrich learning and support student mastery.

Engaging Students in Math Discourse

These sessions will explore the relationship between best instructional practices and student engagement through the emphasis on small group instruction, implementation of mathematical discourse for students, and effective questioning strategies to engage and promote critical thinking in the mathematics classroom.
