**Re: Website Access Update and Security Notice**

We want to make you aware of a recent security issue involving the Get2College website.

Last week, we discovered that our website, [get2college.org](https://get2college.org) had been compromised and infected with malware. Upon identifying the issue, we immediately took the website offline and worked with our software vendor and website hosting provider to address the incident. The website was cleaned, and necessary security scans were completed before it was returned to service.

We have since learned that some web filtering services may be flagging the site as malicious. We are requesting reviews by these filtering services as we become aware of them. However, if your school or district is currently unable to access our website, we encourage you to contact your Information Technology (IT) department.

Please note that our website may continue to appear on certain third-party security watchlists or filtering services for a period of time while those systems update their records.

Again, the [get2college.org](https://get2college.org) website has been cleaned of malware, additional scans performed, and we have returned to full service. We apologize for any inconvenience this may have caused and appreciate your patience and understanding as we worked to address the issue promptly and responsibly.

Thank you,  
Get2College
